

JICA's Nature Conservation Cooperation

Koji MITOMORI

Natural Environment Team1,
Global Environment Department,
Japan International Cooperation
Agency (JICA)

JICA's Role in Official Development Assistance

A bit on History: Transformation of JICA's Nature Conservation

• 1970's

- Afforestation / Reforestation
- Timber harvest
- Technology development and transfer

• 1980's

- Forest inventory and forest management plan
- Wood processing
- Social Forestry

• 1990's

- Community forestry and community development
- Forest conservation
- Watershed management
- Forest fire prevention

• 2000's

- Ecosystem and Biodiversity conservation
- Community based forest management
- Climate change mitigation (AR-CDM, REDD+)

Goal & Strategic Objectives

Overall Goal

Harmonization between Nature Conservation and Human Activities

Farmers Workshop- Kenya

Four (4) Strategic Objectives

◆ Sustainable Forest Management

☆ For Global Warming (REDD plus)

★ For Strengthening Resilience

■ Sustainable Natural Resources Usage

● Biodiversity Conservation

Three (3) International Agenda

UNFCCC

UNCCD

UNCBD

Mitigation

Adaptation

+RAMSAR etc.

Objectives & Approach

Four (4) Strategic Objectives

◆ Sustainable Forest Management

☆ For Global Warming (REDD plus)

★ For Strengthening Resilience

- To strengthen “Readiness of REDD+ (MRV, Pilot activity etc.)” in tropical countries
- To collaborate with private sector in carbon business & CSR ☆

- To introduce appropriate methodology to mitigate Natural Disaster (Watershed Management, Coastal Protection)
- To introduce mechanism such as PES (Payment for Eco-System) ★

■ Sustainable Natural Resources Usage

- To improve livelihood activities in venerable community of Arid or Semi-arid countries through sustainable manner ■

● Biodiversity Conservation

- To improve management of Protected Area and Buffer zone thorough ● collaborative management
- To introduce mechanism such as PES (Payment for Eco-System)

Expected Outcome toward 2020

Four (4) Strategic Objectives

◆ Sustainable Forest Management

☆ For Global Warming (REDD plus)

★ For Strengthening Resilience

■ Sustainable Natural Resources Usage

● Biodiversity Conservation

Indicators (tentative)

- Establish Champion Model 5~7 location
- Assisting expansion of Protection Area (to achieve AICHI Target (COP10/2010) Registration of RAMSAR /MAB (UNESCO) 4 sites
- Capacity Building about 2,000 Person

Forest conservation - Laos

Priority Region/Countries

4 Strategic Objectives

◆ Sustainable Forest Management

☆ For Global Warming (REDD plus)

★ For Strengthening Resilience

■ Sustainable Natural Resources Usage

● Biodiversity Conservation

Priority Program

Asia-Pacific, Africa (Central & South Africa), Amazon

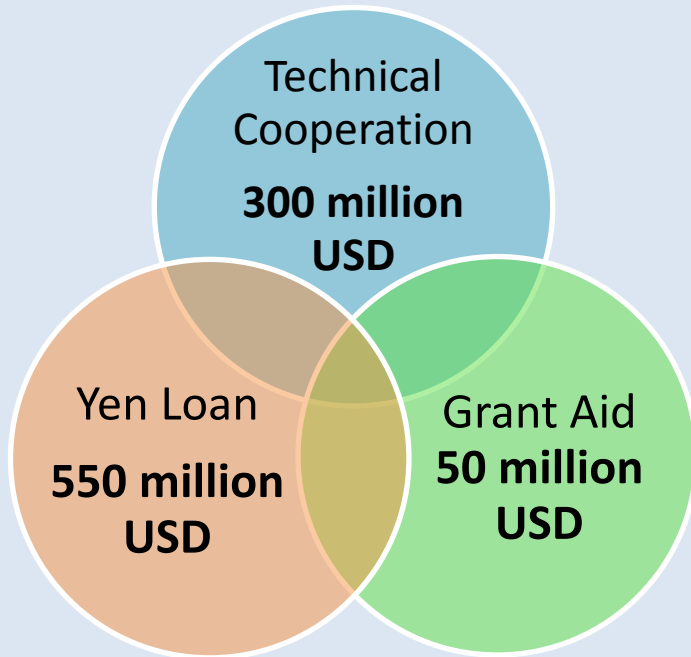

Asia (Vulnerable Area), Latin America (Watershed Management)

Sahel/Sahara Region, Other Vulnerable Countries

Southeast Asia, Latin America

Budget (2014–2020):
900 million USD

<tentative estimation>

Major Component

- Policy Support
- Capacity Building
- Awareness / Advocacy
- Research / Development
- Livelihood Improvement
- Networking

THANK YOU
