End-user Interviews End-user Questionnaire

Key Biodiversity Areas - End-User Questionnaire

During the 2004 World Conservation Congress, IUCN Members requested that the IUCN "convene a worldwide consultative process to agree a methodology to enable countries to identify Key Biodiversity Areas" (WCC 3.013). Key Biodiversity Areas (KBAs) are sites contributing significantly to the global persistence of biodiversity. A great deal of collaborative work and research has been undertaken since that time, convened through the IUCN Species Survival Commission (SSC) and the World Commission on Protected Areas (WCPA) Joint Task Force on Biodiversity and Protected Areas.

The aim of the consultation process is to develop a globally agreed standard for the identification of KBAs, which draws and builds on existing approaches, while responding to end-users needs for a scientifically rigorous yet pragmatic methodology. End-users are considered to be those involved in decision-making processes linked to mechanisms to secure biodiversity or to avoid biodiversity loss.

The purpose of this end-user consultation is to seek opinions on how the information produced through the application of the KBA Standard can:

- be used to inform policy and practice;
- best suit end-user needs; and
- result in the best outcomes for biodiversity.

This questionnaire is being conducted in association with the IUCN SSC/WCPA Joint Task Force on Biodiversity and Protected Areas as part of research underway at the University of Edinburgh. Further information on data protection and ethics can be found at the end of the questionnaire.

Your time and input are greatly appreciated.

Framing Workshop

Typology of End-users

Scale	End-User
Global/R regional	Intergovernmental treaties
	Intergovernmental agencies
	Intergovernmental coalitions
	Multi-lateral Development Banks
	Donors
	Multinational companies and industry associations
	International conservation and development NGOs
	Global assessments

Scale	End-User
National / Sub- national	Government: conservation agencies
	Government: agencies managing living resources
	Government: other agencies
	Industry/industry associations
	Investors
	Cultural/spiritual institutions
	NGOs
	Communities: indigenous and local

Global Consultation Process

28 Global consultation events

11 Regional consultations with **> 300** participants

3 Technical expert workshops

27 End-user interviews

27 End-user Interviews

3 Intergovernmental conventions

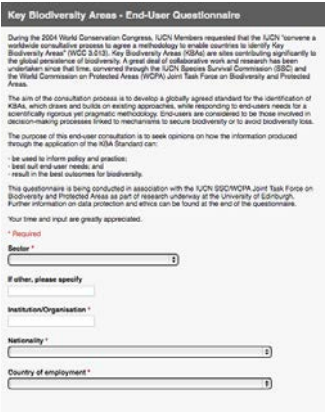

4 International agencies and donors

5 International NGOs

5 Private sector and industry associations

6 Regional, national and local organisations

4 Thematic perspectives

End-user Questionnaire

17

Questions on key themes derived from interviews

5

Open ended questions asked during end-user interviews
