

The Global Freshwater Biodiversity Atlas – A Model for EBV dataset discovery?

Jörg Freyhof

Executive Director, Group on Earth

Observations Biodiversity Observation Network

<http://atlas.freshwaterbiodiversity.eu/>

The screenshot shows the homepage of the Global Freshwater Biodiversity Atlas. At the top left is the 'Biofresh' logo, which features a globe with a fish and a bird. To its right is the title 'Global Freshwater Biodiversity Atlas' in green, with the subtitle 'The gateway to freshwater biodiversity maps' below it. A navigation menu contains links for HOME (Atlas Home Page), ABOUT (About the Atlas), EXPLORE (Content and Search), MAPS (Map Interface), CONTRIBUTE (How to Publish Maps), and MANUALS (Find Help Here). In the bottom right corner of the navigation area, there are icons for font size adjustment and a 'Login' link. Below the navigation is a row of partner logos, including GEO Group on Earth Observations GEO BON, IUCN SSC, Global Water System Project, Conservation International, Wetlands International, The Nature Conservancy, and WWF. The main content area is divided into three columns: 'EXPLORE' with a dragonfly image, 'MAPS' with a river landscape image, and 'CONTRIBUTE' with a white lotus flower image.

We need an integrated global plan to network observations and models on the trends of biodiversity
