

The Biodiversity Indicators Dashboard

--Monitoring Biodiversity Trends and Conservation Performance

Healy Hamilton, Xuemei Han,
Lori Scott, Tom Brooks (IUCN) &
the NatureServe Dashboard
Team

The Biodiversity Indicators Dashboard is intended to help communicate progress toward conservation goals, such as the Aichi targets and National Biodiversity Strategies and Action Plans

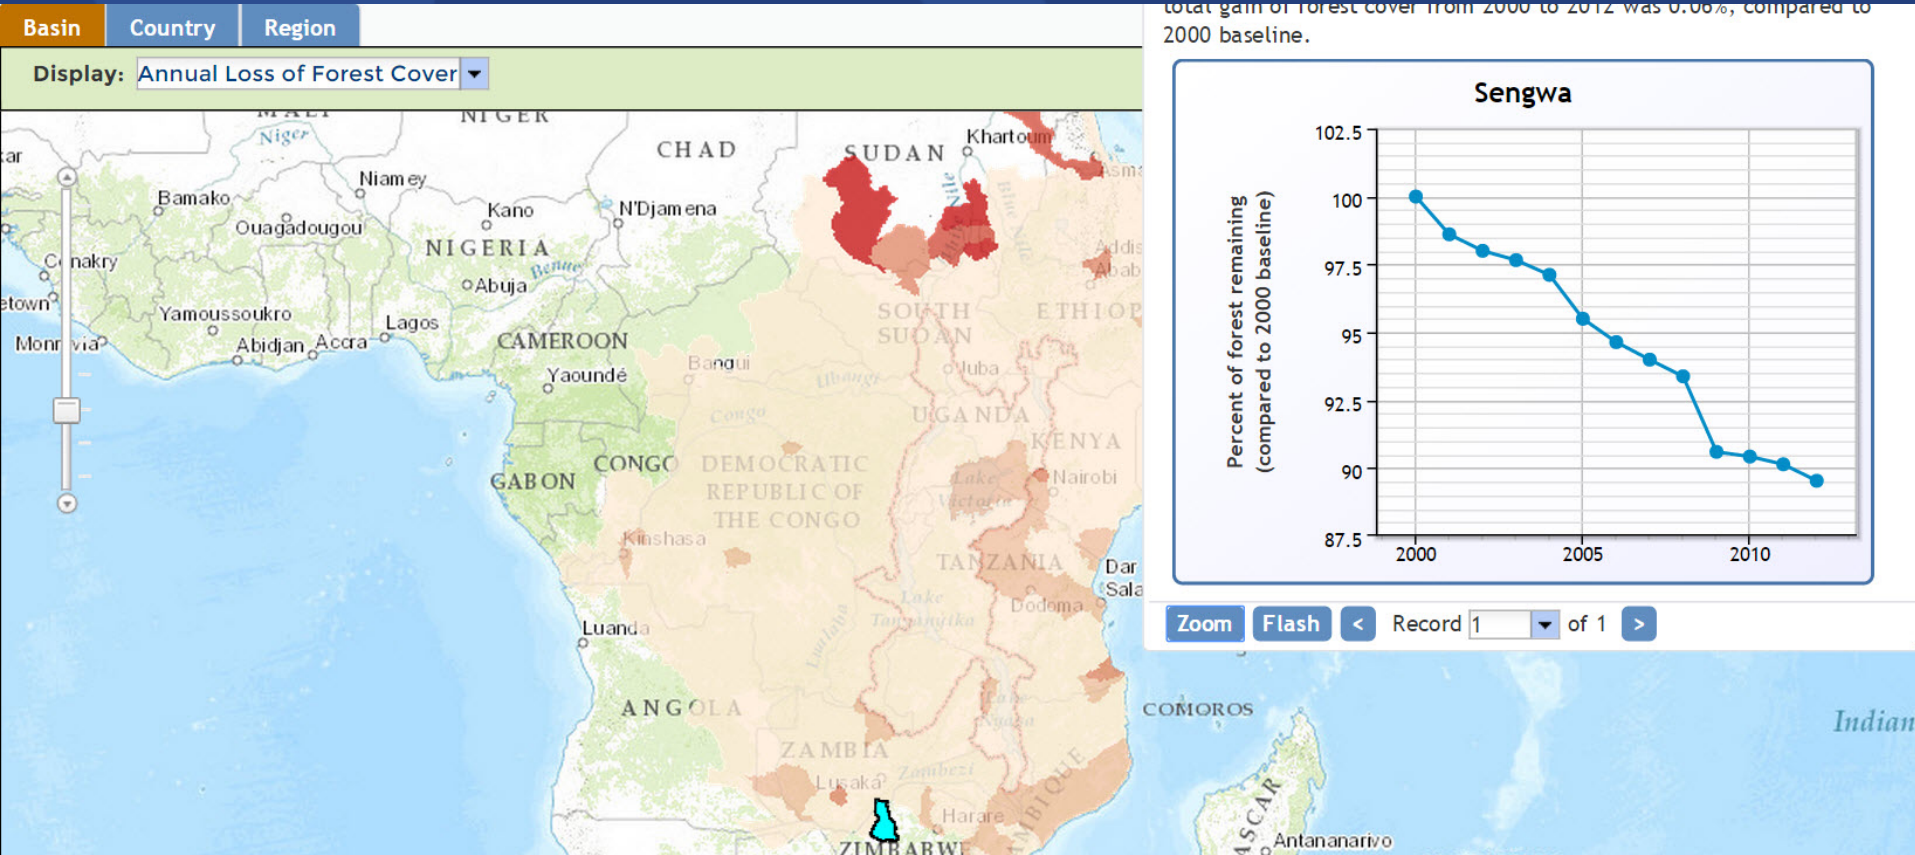

[Home](#) [Dashboard](#) [About The Dashboard](#) [Contact Us](#)

Forest cover

How fast are forests being lost in a country or river basin?
[Learn More ▶](#)

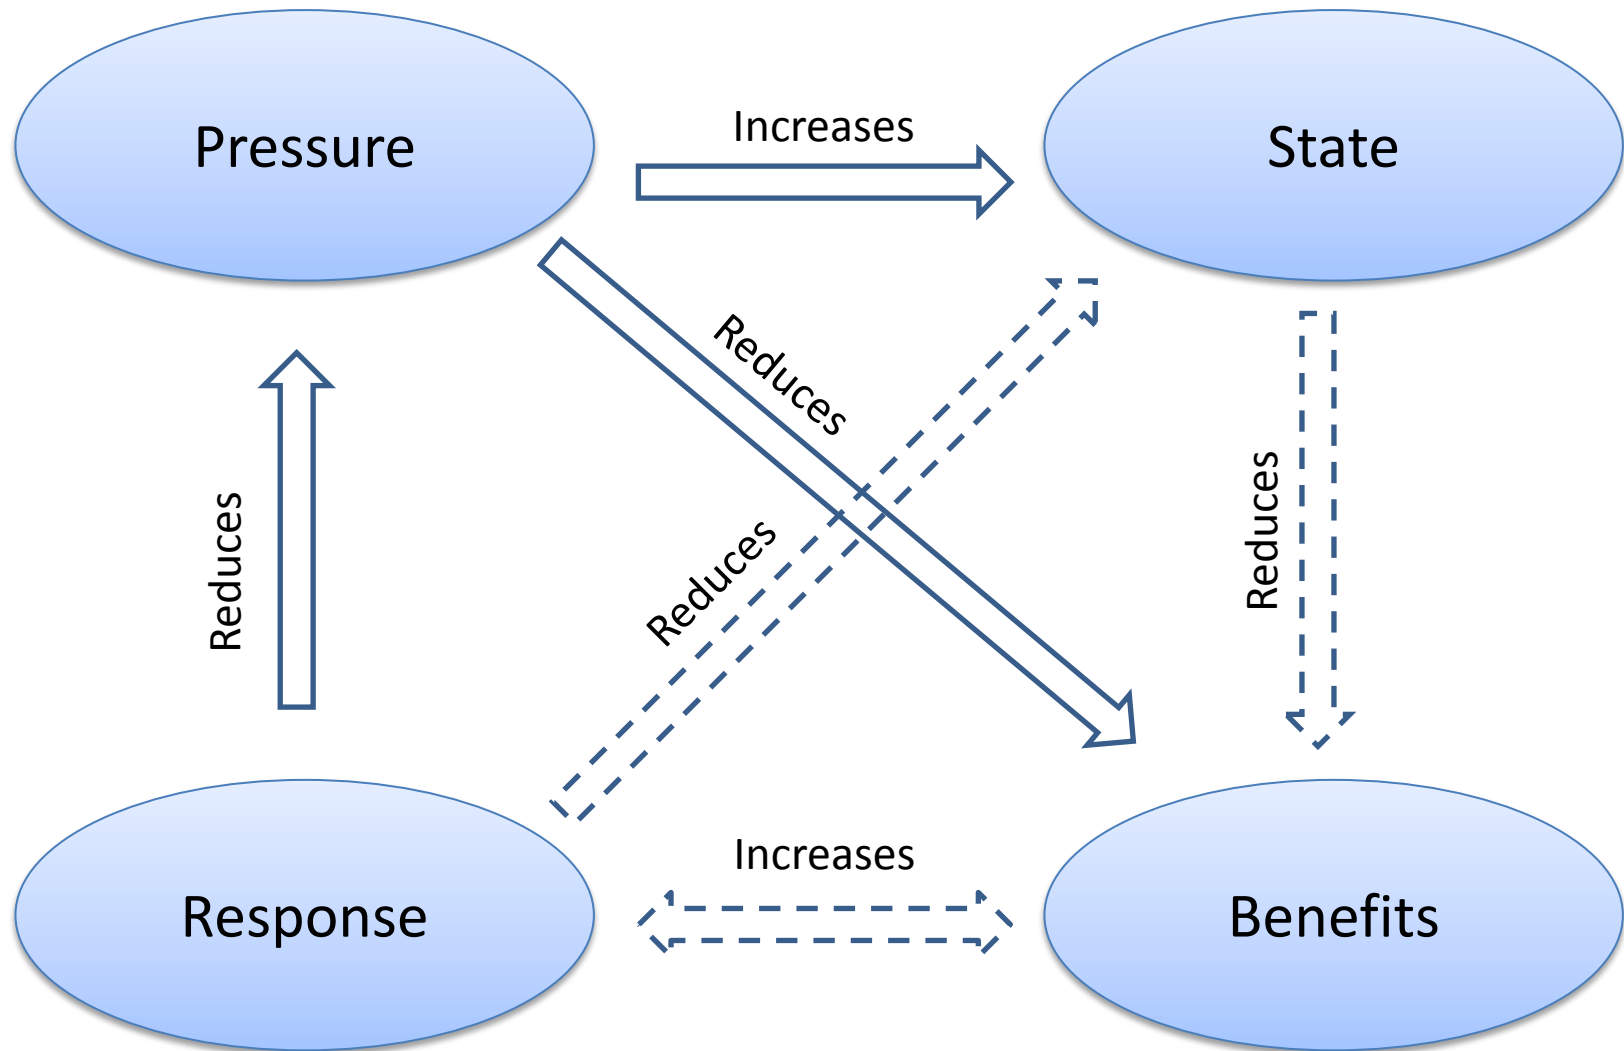

The Biodiversity Indicators Dashboard helps provide easily understood information on biodiversity status and trends at multiple spatial scales

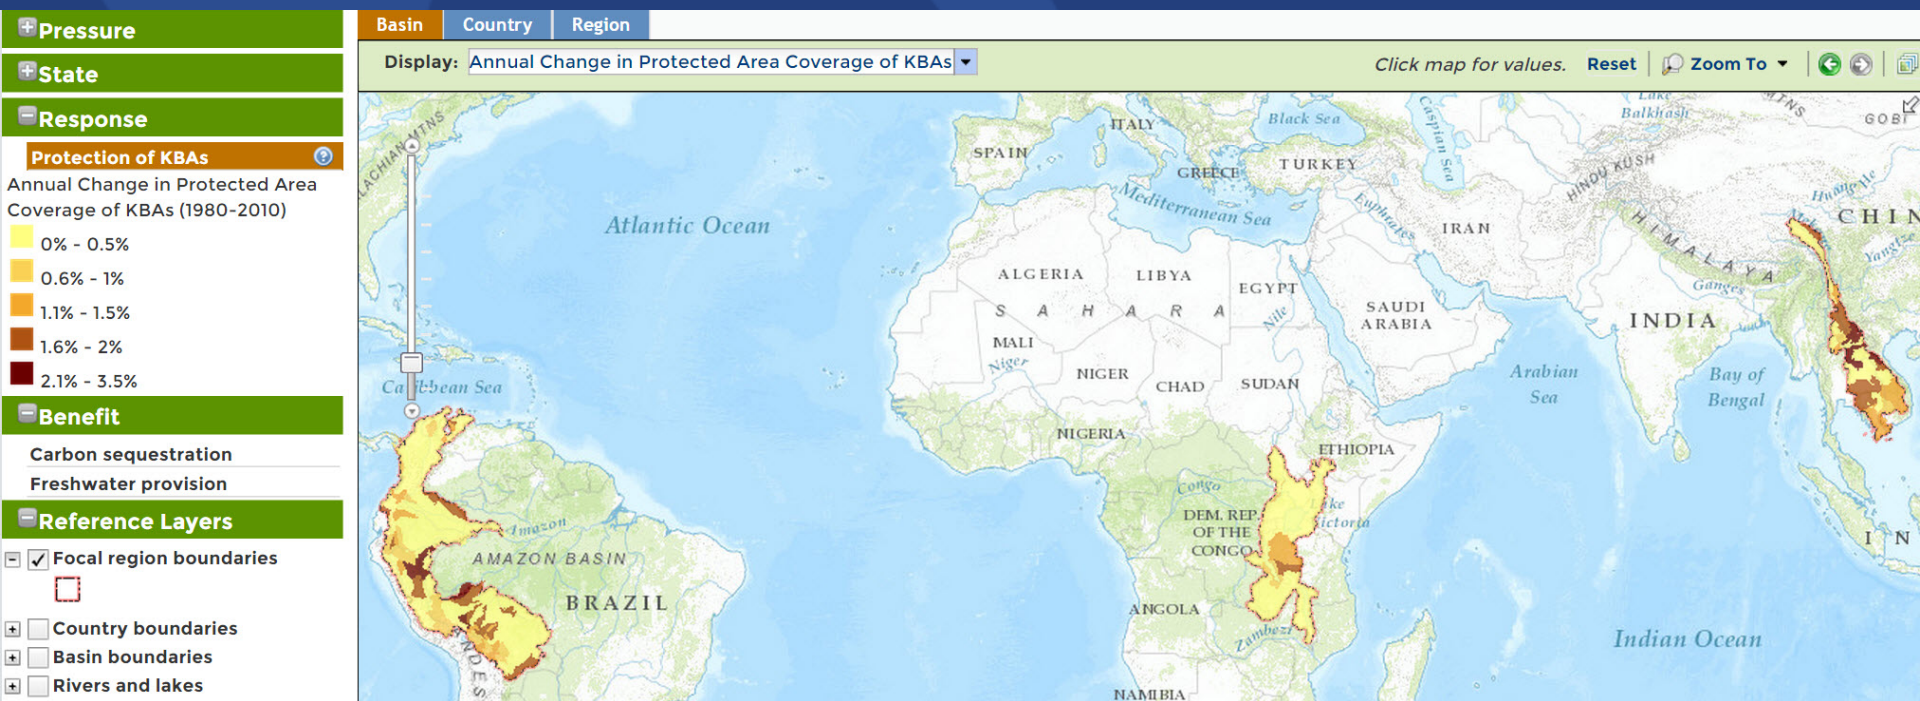

The Biodiversity Indicators Dashboard is currently enabled for 3 regions of high biodiversity value

Conceptual framework

The Biodiversity Indicators Dashboard analyzes and visualizes time series datasets on biodiversity status

Partnership and Collaborators

To learn more about the Biodiversity Indicators Dashboard:

Saturday Nov 15 2:00-2:30 pm

Tuesday Nov 18 11:00-11:30 am

Protected Planet Pavilion
