Global Conservation Fund: A New Approach

Perpetuity

Design Capacity

A large, smooth, brown rock formation with vertical striations, set against a backdrop of dense green forest and distant hills under a cloudy sky.

Measuring Impact

An aerial photograph of a waterfall. The waterfall originates from a rocky cliff face covered in patches of green vegetation and flows down into a large, turquoise-colored pool of water. The surrounding terrain is rugged and rocky, with some areas showing signs of erosion or mineral deposits.

Amplification

Lessons and Future Directions
