Protecting Important Bird and Biodiversity Areas using Biodiversity Stewardship: through government, landowner and NGO partnerships

Daniel Marnewick: BirdLife South Africa, Important Bird and
Biodiversity Areas Programme, daniel.marnewick@birdlife.org.za

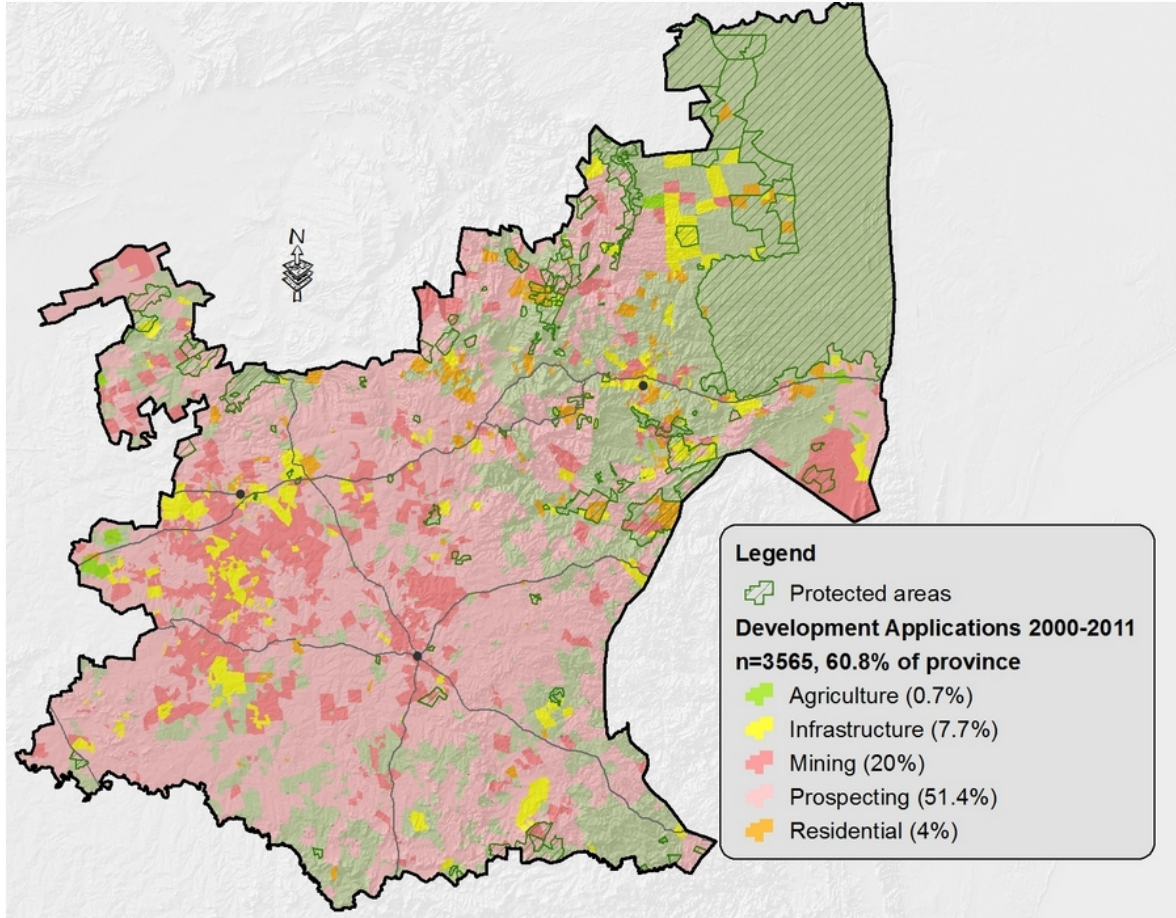

Background: Important Bird and Biodiversity Areas

- 122 IBAs in South Africa.
- Network of most important sites for bird conservation.
- More than 60% unprotected.

Background: Development context

Threats to grasslands

- Mining & agriculture.
- Only 2.8% protected.
- 65% transformed.
- 71% under mining.

Background: Expanding Protected Areas

National Protected Area Expansion Strategy for South Africa 2008

Priorities for expanding the protected area network for ecological sustainability and climate change adaptation

Government of South Africa

- Road map for PA expansion.
- Aims to meet targets – CBD Aichi target 11.
- Speaks to development and biodiversity needs.
- Allows the formal protection of a multiple use landscape, under private ownership.
- **Biodiversity Stewardship**, a policy enabled, cost-effective model to expand protected area network.

The Tool: Biodiversity Stewardship

Case Study: Mpumalanga Lakes District

- 350 natural pans and wetlands in pristine grasslands.
- An 'IBA in Danger'.
- Proclaimed a PA in January 2014 using Biodiversity Stewardship.

Case Study: Threats

Inappropriate Mining

Over Grazing

Incorrect
Burning

Biodiversity Stewardship: Expand the PA Network

Privately owned areas with high biodiversity value receive secure conservation status and are linked to a network of other conservation areas in the landscape.

*60 000ha
16 land owners*

Landowner Incentives & Benefits

- Management support.
- Economic development.
- Fiscal benefits, e.g. taxes & rebates.
- Protection in perpetuity.

Creates Tourism and Jobs

Management for Biodiversity and Development

Climate change mitigation

Food and water security
